IT exam study guide / simulations

Exam : **2V0-31.20**

Title : Professional VMware vRealize
Automation 8.1

Vendor : VMware

Version : DEMO

NO.1 Which vRealize Automation service is only available through an external appliance in vRealize Automation Cloud?

- A. Cloud Assembly
- B. vRealize Orchestrator
- C. Code Stream
- D. Service Broker

Answer: B

NO.2 An administrator needs to create a new project for the development team. Which vRealize Automation resource can be added to a project?

- A. Image Mappings
- B. Cloud Zones
- C. Flavor Mappings
- D. Cloud Accounts

Answer: B

NO.3 An administrator wants to simplify the cloud configuration as much as possible. Recently the administrator was asked to simplify the blueprint creation and requesting process. The goal is to create a single blueprint that can be deployed to different cloud accounts available in the environment.

Depending on the cloud, the appropriate template should be used.

Which vRealize Automation construct can the administrator use to achieve this goal?

- A. Flavor Mappings
- B. Storage Profiles
- C. Customization Specifications
- D. Image Mappings

Answer: C

NO.4 Refer to the exhibit.

A new vRealize Automation user is logging in for the first time. Upon login, the user is presented with the attached screenshot.

Which step must the Organization Administrator take to resolve the issue?

- A. Assign the user the Organization Member role
- B. Assign the user a Service role
- C. Assign the user a Content Developer role
- D. Assign the user the Directory Administrator role

Answer: A

NO.5 An administrator is configuring user roles to access various vRealize Automation services. The development team members require access to create and test blueprints and manage their deployments.

What is the minimal service role the development team members require?

- A.** Service Broker User
- B.** Cloud Assembly User
- C.** Service Broker Administrator
- D.** Cloud Assembly Administrator

Answer: D
