IT exam study guide / simulations

Exam : **ACP-600**

Title : Project Administration in Jira
Server

Vendor : ATLASSIAN

Version : DEMO

NO.1 Below you are shown an extract of a field configuration used by all issue types in your project.

Name	Required	Renderers	Screens
A detailed description	Yes	Wiki Style Renderer	 1 screen

The field 'A detailed description' is a custom field of type Text field (multi-line). Which two statements are true? (Choose two.)

- A. The field is mandatory in each issue type used in the project.
- B. The project is configured to use only a single screen.
- C. Users will be able to format text in the field.
- D. The maximum text length is limited to 100 characters.
- E. The field can only be used in combination with the Description system field.

Answer: C,E

NO.2 You are helping a manager to translate business requirements into a Jira project configuration.

The manager wants users to indicate which systems are impacted by a bug.

You are unsure if systems should be configured as components or as a custom field.

Select two situations in which components must definitely be used rather than a custom field.

(Choose two.)

- A. Systems must have a default value.
- B. Systems must be required on the screen.
- C. Assignee must be set based on the selected system.
- D. Users must be able to select multiple systems.
- E. Systems must be managed by project administrators.
- F. Systems must be exportable to CSV.

Answer: B,C

NO.3 You are asked to change who receives notifications when issues are moved.

The settings in the default notification scheme used by your project are shown in the table below.

Issue Moved (System)	<ul style="list-style-type: none"> ▪ Current Assignee ▪ Reporter ▪ All Watchers
-----------------------------	--

As a project administrator, why are you NOT able to update the notification scheme?

- A. You are not a Jira administrator.
- B. The default notification scheme cannot be edited.
- C. The extended project administration option is not enabled.
- D. The notification scheme is shared.

Answer: A

NO.4 An extract of a permission scheme is shown below.

Permission	Granted to
Administer Projects	Project role: Administrators
Browse Projects	Project role: Users
Assign Issues	Project role: Managers
Close Issues	Project role: HR-staff
Create Issues	Project role: HR-staff
Transition Issues	Project role: HR-staff
Edit Issues	Project role: HR-staff
Work on Issues	Project role: Users

Jennifer Evans needs to be able to:

- * Manage project role membership
- * Log time to issues

What is the minimum number of project roles she needs?

- A. 1
- B. 3
- C. 4
- D. 2

Answer: B

NO.5 Your development team has just released their first version of a GPS tracker yesterday. The next product release is not due for another 3 months.

Which two JQL queries, when executed today, will list all features shipped in the 1.0 version? (Choose two.)

- A. project = GPS AND type = Feature AND fixVersion in releasedVersions()
- B. project = GPS AND type = Feature AND fixVersion in (1.0)
- C. project = GPS AND issuetype = Feature AND fixVersion(s) IS NOT EMPTY
- D. project = GPS AND type = Feature AND fixVersion(s) = "1.0"
- E. project = GPS AND issuetype = Feature AND fixVersion in 1.0
- F. project = GPS AND issuetype Feature AND fixVersion = released()

Answer: C,D
