- A. Ensuring all data is encrypted
- B. Regularly testing the recovery process
- C. Training all users on the recovery process
- D. Keeping a physical copy of backups

**Answer:** B

**NO.3** What is a significant challenge when configuring PowerProtect Data Manager for Kubernetes cluster backup?

- A. Managing cluster node backups
- B. Backup of ephemeral data
- C. Network configuration for inter-cluster communication
- D. Balancing resource allocation

**Answer:** B

**NO.4** What is a primary consideration when backing up file systems with PowerProtect Data Manager?

- A. File system type
- B. Average file size
- C. Number of files
- D. File access permissions

**Answer:** A

**NO.5** Which two user roles have permission to export audit logs from the PowerProtect Data Manager user interface?

- A. root
- B. Backup Administrator
- C. Security Administrator
- D. Administrator
- E. Restore Administrator

**Answer:** AB

**NO.6** For a comprehensive backup strategy in PowerProtect Data Manager, what is essential when dealing with large-scale data?

- A. Regular data archiving

- B. High-capacity storage devices
- C. Multi-threaded backup processes
- D. Data deduplication and compression

**Answer:** D

**NO.7** What is a primary consideration when backing up file systems with PowerProtect Data Manager?

- A. File system type
- B. Number of files
- C. Average file size
- D. File access permissions

**Answer:** A

**NO.8** When restoring data in PowerProtect Data Manager for MS-SQL, what is a key step for ensuring data consistency?

- A. Restoring the master database first

- C. Rebuilding SQL indexes after restoration
- D. Restoring transaction logs sequentially

**Answer:** D

**NO.9** In PowerProtect Data Manager, which aspect is critical when backing up a File System for performance optimization?

- A. File system type (e.g., NTFS, EXT4)
- B. File system size
- C. Number of files
- D. File permissions

**Answer:** A

**NO.10** A customer is deploying PowerProtect Data Manager OVA and wants to use thick provisioning.

What is the required minimum free space?

- A. 3.9 GB
- B. 4.0 GB
- C. 319 GB
- D. 635 GB

**Answer:** D

**NO.11** Which agent must be installed to protect a Microsoft SQL database with PowerProtect Data Manager?

- A. Microsoft SQL Agent
- B. Microsoft Application Agent
- C. Database Application Integration

**D. Database Application Agent**

**Answer:** B

**NO.12** For a large enterprise using PowerProtect Data Manager, what is a critical consideration for disaster recovery planning?

- A.** Selecting a cloud-based recovery site
- B.** Ensuring multi-region data replication
- C.** Conducting frequent employee training
- D.** Implementing a tiered storage strategy

**Answer:** B

**NO.13** Which feature supports Kubernetes backups being moved from a PowerProtect DD system to the cloud?

- A.** Cloud Boost
- B.** Cloud Tier
- C.** PowerProtect Cloud Snapshot Manager
- D.** Cloud Disaster Recovery

**Answer:** B

**NO.14** In configuring PowerProtect Data Manager with a NAS device, which protocol is preferred for efficient data transfer?

- A.** iSCSI
- B.** FTP
- C.** NFS
- D.** SMB

**Answer:** C
